English literature - 7, English language - 6

**EDEXCEL** - Sha Tin College

Economics - 8

## Projects

December 2021 – July  
2022

### **ImpactHK collaboration**

ImpactHK is a charity that helps people currently experiencing homelessness and help them settle into a safe home, restore their self-esteem and social capital, and help discover their purpose.

The initiative we undertake in our project is to find balance between providing financial assistance and emotional support. These initiatives could include kindness walks, visits to impactHK center and podcasts. Other initiatives will be carried out by the organization such as providing housing food, supplies such as clothes and masks and possible counselling services for those in need. In this project, I took responsibility in the role of liaison and team management, having to contact guests to participate in our events and prepare scripts and questions during events. I learned how organising and work with a large group of people can have many advantages as well as drawbacks. Having to reach out to new people, I developed social skills and a stronger tolerance to heavy workload.

We collected 600 masks and 50 kindness card designs over a 6 months period. We replicated the cards to match a 1:10 card-mask ratio in preparation for the final sendoff.

### **Environmental council**

The school's environmental council a committee responsible initiating activities that help to improve the environmental sustainability within the school campus. Some of the notable activities the environmental council have achieved is the removal of plastic cutlery in the school canteen and the collection of food waste for plant composition. During my time as a council member, I have contributed in strategizing ideas for ocean awareness week and also helped to advocate the school community of upcoming events from the environmental council.

### **Badminton team volunteer coaching**

Junior Badminton team (Year 7-9) coaching during afterschool hours. The team goes through 2 hours of drills and fundamentals drills such as footwork practice, strength conditioning and game strategy for doubles and singles. They then are placed in groups to play 1v1s against each other. At the end of the semester the badminton team entered a junior high competition placing third at the end.

November 2021

### **CIS X Ideas**

CIS X IDEAS is a coding competition which is held annually by CIS. This year's competition topic was education. Every group in this competition is given a time period of a week to create their product which is then presented to the judges through a 3-minute speech and at the end a winner will be selected to claim a prize. Reached semi-finals in the competition.

September 2021

### **ESF COCO Hackathon**

A coding competition available to all ESF school students. In the event, me and my team investigate on a given topic. we are given a period of time to discuss, create and present our solution to the topic/ theme. In our solution, we must incorporate coding or software into the making of the answer. After all the judges have seen all the group's presentations. They will award the group with the best solution. This experience has help me develop my leadership skills, taking

responsibility and help guide my teammates to productively make our solution in the limited time that we had. Using my coding skills to solve problems helped to hone my critical thinking skills and communication skills when presenting our idea to the judges.
